

VPB Connect

Connect with your supporters in less time.

Unlock the full potential of OpenVPB with VPB Connect. Quickly and seamlessly dial contacts, including cell phones, from within any browser or device. VPB Connect improves the experience and saves time for volunteers and lets you reach even more supporters, all in the tool that you and your volunteers already know and love.

VPB Connect

Available as an add-on to Bonterra's Organizing tool.

Integrated Workflow

Easily set-up VPB Connect from the same interface you would a Virtual Phone bank. That means the same script creation and universe selection you know and love, as well as improved calling analytics and contact method scoring.

Support Contact

Simulate an in-person Phonebank with an organizer by designating a support contact with a name, email, and phone number on your VPB Connect list. Volunteers who need assistance while calling can easily reach out to the right person for help.

Efficient Virtual Volunteering

Cut down on time between calls, and enhance the volunteer experience. VPB Connect ensures that your virtual phone banks will be more efficient than ever.

Script Branching

Cater script responses to the flow of the conversation in real time. By giving more responses for volunteers to follow using branched scripts, you are reaching more people and improving the virtual volunteering experience.

VPB Connect is simple to set up and use with Bonterra's Organizing solution. To have it enabled, contact your Account Executive.
